Detailed Action

The following is responsive to applicant's amendment received Aug. 26, 2005.

Claims 1-4 are currently pending.

The previous double patenting rejections set forth in paragraphs 2-5 of the office action mailed Aug. 10, 2004 are withdrawn in view of the terminal disclaimers received Aug. 26, 2005. The terminal disclaimers have been approved and recorded.

The finality of the office action mailed April 7, 2005 is withdrawn and prosecution on the merits is reopened in view of a new ground(s) of rejection submitted herein below.

New Ground(s) of Rejection

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 4 of copending Application No. 10/094,686. An obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but an examined application claim is not patentably distinct from the reference claim(s) because the examined claim is either anticipated by, or would have

Art Unit: 1614

been obvious over, the reference claim(s). See *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are generic to all that is recited in the claim 4 of USAN '686. That is, claim 4 of USPN '686 fall entirely within the scope of the claims of the instant application. In other words, the claims of the instant application are anticipated by claim 4 of USAN '686. Specifically, claim 4 of USPN '686 recites an aqueous soluble β -glucan composition comprising β -glucan molecules having a molecular weight of about 2,000,000 daltons to about 4,000,000 daltons, wherein the composition has a triple helix aggregate conformation and enhances immune response without stimulation production of biochemical mediators that induce detrimental side effects. Please note claims 1-4 of the instant application aren't specific to any kind of triple helix conformation and are broad enough to include the β -glucan composition described in claim 4 of USAN '686.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

Claims 1-4 are rejected.
